Scanfrost Cold Rooms

Scanfrost Coldrooms are an innovative full range of modular walk-in coldrooms with significant advantages over conventional coldrooms. These coldrooms are a result of an R&D project involving experienced professionals from various countries. With a wide range of dimensions, with a unique versatility through almost infinite configurations, Scanfrost Coldrooms offers practical and professional storage and conservation solutions for hotels, restaurants, catering companies, supermarkets and industrial kitchens.

Unlimited Combinations

The Scanfrost Coldrooms can be adapted to almost any situation and configuration.

Available in 56 models, equipped with high-density 85mm foam core insulation panels and two versions.

Available in two heights (2 and 2.4 m with floor) is ideal for small spaces and is the perfect solution when a refrigerator is no longer enough.

Features

- Simple assembly in under 3 hours
- Designed for max safety & efficiency etc
- Full insulation instructions provided

Scanfrost Modular Coldrooms

- Simple assembly in under 3 hours
- Designed for Maximum Safety and Efficiency
- 85mm High Density Polyurethane (200% better insulation than polystyrene)
- High quality materials
- Scalable and fully transportable system
- Unique modular portable solution
- Unique modular Cam Lock construction
- Universal "Cam Lock Alan Key"
- Insulation caps for Cam Lock system
- High-Grip black resin and food-safe floor
- Quick assembly and disassembly
- Internal safety release with fluoro illumination
- Non-permanent installation
- Choice of left or right-handed door
- Door handle with key security lock and key
- Wide door opening – 800mm wide x 1900mm high
- 180° Hinged Door
- 2m internal height
- White "RAL9006" finish external wall/roof panel
- White finish internal wall/roof panel
- Full insulation instructions provided

New for 2009

Straddle Monoblock

The GM2 series monoblock is a New-generation electronic command station with easy to use user interface and organized into folders, programmable according to various system requirements.

The main functions are:
- Adjustment of thermostat differential
- Entering work setting
- Automatic or manual defrost
- Evaporator fans start delay
- Pause after defrost to drain condensation water
- Sensor breakdown alarm
- Turning cold room light on
- Protection on number of pressure switch cut-ins.
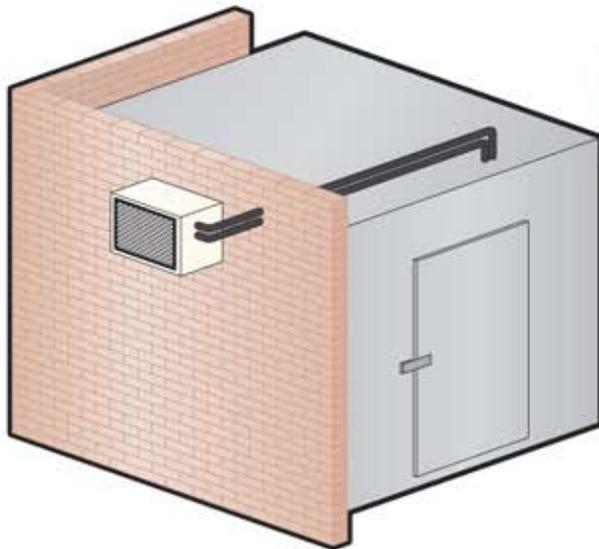

Remote heat extraction system

- Cost effective, simple solution for removing heat from your coldroom out of the kitchen, important where heat build-up is an issue on site
- Simple installation, even if located outside, reduces installation and commissioning costs and minimises disruption
- Once operational, the system offers environmental benefits with lower running costs and noise levels
- tional water-cooled, heat-removal system available

Shelving

Standard

High quality coldrooms are not really useful without well designed shelving units. Scanfrost standard modular shelving offers you the best way to organise your coldroom. Not only do they have an excellent quality/price relation, but they also offer important advantages which make them the best solution for hotels, restaurants, hospitals, laboratories.

Optional Aluminium shelving

- High quality materials: Aluminium plumbs and shelves anodized with 15 microns Elegant, functional and simple design
- Easy to assemble with no screws
- Easy clean and maintain due to its easy system to remove the shelves.

New for 2009

Scanfrost Coldroom Assembly

Easy Assembly

Due to its modern kit architecture, Scanfrost coldrooms are very easily assembled, in a surprisingly short time. They can be set up from within which maximises usage of the room area and ceiling. The assembly process is totally clean, simple and requires no cuts in the panels. In a few hours the new coldroom is ready for operation without interfering with the activities in surrounding areas. The Scanfrost coldroom is assembled by interlocking a cam and pin from plastic boxes inserted with precision in each modular element. In addition, wall and ceiling panels are interchangeable.

The combination of these two features gives the Scanfrost range three key advantages:

- Maximum usage of the space available for the coldroom.
- The possibility to easily dismantle the coldroom and move it to a different location.
- The coldroom can easily be expanded or its configuration can be modified without turning it off or removing the stored goods.

Exclusive Design

A quick glance at Scanfrost coldroom is sufficient to appreciate its new, improved design. Its most noticeable features are:

- Soft Door: a symbol of its modern design and a symbol of the brand.
- Components are made with high-quality, durable easy to clean materials.

Floors

Scanfrost coldrooms can be supplied in a wide range of antiskid floors that make it adaptable to different loads, including intensive forklift stuck traffic. The standard floor has a phenolic resin finish, although top-quality stainless steel floors are also available.

Floor Panels	Standard Floor	Reinforced Floor
Finishing	Phenolic Resin	Stainless Steel

Maximum Admissible Loads

Distributed Static Load	3.000 kg/m²	4.000kg/
Concentrated Static Load	400 kg/60cm²	500 kg/60cm²
Dynamic load on four Rubber wheeled vehicles	500 kg/m²	800 kg/m²

Standard Floor

Reinforced Floor

New for 2009
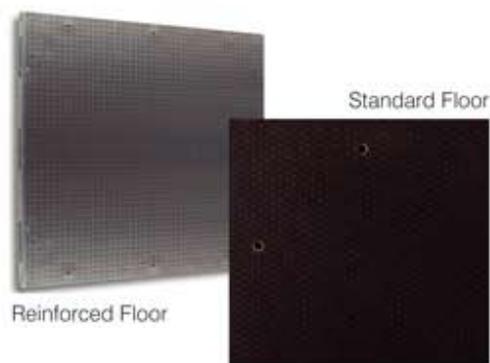

High quality materials

The Scanfrost Coldrooms only use the best materials to ensure quality and hygiene, thanks to modern manufacturing techniques meeting the most demanding European standards. Food-safety grade galvanised steel cladding is used for vertical walls and roof. The floor panel, in the negative temperature cold rooms, are reinforced and offer a finishing made of synthetic resin or stainless steel.

Options

* Sliding Door Systems
* Choice of Bromic Freezer or Chiller System
* Shelving
* Strip Curtain
* Temperature monitoring system
* Internal Coving
* Freezer rooms provided with a "negative temperature door"
* Internal light switch
* Freezer (heated door required)
* Installation (price on application)
* Safety Pressure relief valve (freezer only – panel not cut)
